Premium materials for Sporting Goods Application

AKD 0426

Premium resin system

APPLICATION

DURABILITY IMPROVEMENT

- Limit Warranty returns and generate profit
- Create new materials design for lighter products
- Improve performance with unique innovation

BENEFITS

- Structural improvement owing to nanochemicals
- Available as ready-to-use kit: resin and hardener
- Optimize price/performance ratio

MORE FEATURES

- Low viscosity system
- Temperature resistance
- Suitable for several processes such as infusion, hand lay-up and filament winding
- Improve damage tolerance such as impact, crack propagation or fatigue resistance
- Room temperature curing system allows to manipulate parts before post curing
- Solvent free resin system for safe handling
