Premium materials for Transportation Application

AKD 9427

Premium resin system

Innovative solution for optimized design

APPLICATION

DURABILITY IMPROVEMENT

- Get lighter products through material design optimization
- Optimize fuel consumption
- Limit carbon foot print

BENEFITS

- Structural improvement owing to nanochemicals
- Available as ready-to-use kit: resin and hardener
- Optimize process
- Access to high temperature resistance parts

MORE FEATURES

- Suitable for several processes such as infusion, hand lay-up and filament winding
- Room temperature curing system allows to manipulate parts before post curing
- Improve damage tolerance such as impact, crack propagation or fatigue resistance thanks to nanochemicals
- Solvent free resin system for safe handling
