

INNNOVIUM

WE Apps

Premium materials for Wind Energy Application

AKD 2078

Premium resin system

Innovative solution dedicated to green energy

APPLICATION

DURABILITY IMPROVEMENT

- Improve lifespan of blades or wind turbine parts
- Reduce Maintenance Cost
- Limit systems shut-down

BENEFITS

- Structural improvement
- Access easily to large part manufacturing
- Optimize infusion process

MORE FEATURES

- Adjustable pot life
- Very low viscosity
- Room temperature curing allows removing parts from molds before post curing
- Solvent free resin system for safe handling
