Premium materials for Wind Energy Application

AKD 2529

Premium hot-melt resin system

APPLICATION

DURABILITY IMPROVEMENT

- Improve lifespan of blades or wind turbine parts
- Reduce Maintenance Cost
- Limit systems shut-down

BENEFITS

- Structural improvement
- Available as hot-melt semi-solid resin
- Optimal solution to access prepreg process for blades and wind turbine parts manufacturing
- Optimize price/performance ratio

MORE FEATURES

- Also available as semi-solid resin film for an easier way to manufacture composites
- Solvent free resin system for safe handling
