

The Company

Leading innovative formulator and solution provider for users of specialty epoxy systems,

NANOFORMULATION :
Core competence, strong expertise in nanotechnology, polymers, processing and green formulation,

Unique partner for tailor-made resin systems, problem solving approach, and innovation management,

NANO IN™ patented integration technology to take advantage of nanochemicals for development of better and safer materials,

Third-party Proven results on more than **2,200 samples**,

From lab-evaluation to **industrial mass production** (300 tons/year capacity).

The Solution

INNOVIUM

Complete range of customized resin systems and intermediate resin films,

INNOVIUM Apps

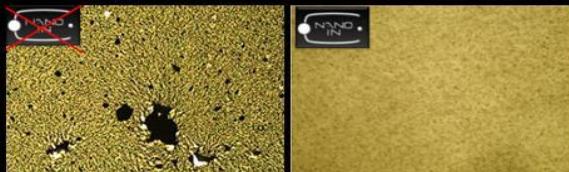

Because DURABILITY & PROCESSABILITY mean different things per industry application, we customize our INNOVIUM solution for creating innovative materials together. Better, Safer.

PROMOTING DURABILITY, SELING PROCESSABILITY !

Dedicated to the Fabrics Weavers, Prepreg Makers, Composite Part Manufacturers and End Customers , INNOVIUM is composed of specific application designed systems named " INNOVIUM Apps".

Per application and functionality (Sports, Aero, Civil engineering, Oilfield, Wind Energy...), Nanoledge develops, manufactures and delivers you premium materials based on nanoblending technologies & industrial know how. Worldwide.
